

Retrospective

Angel: overall the project went fine

David: some struggles when creating prototype, overall went well. Maybe spend more time at TQ5

Vilius: Overall good, communication could be a bit better.

Rick: Splitting up was good, messy at first. Slightly worried about being locked in on one "role". Clearer planning, maybe plan further ahead. Overall direction is good.

Marco: Overall direction is fine. Punctuation should be improved. Good how we improved our standup structure.

Raymond: Slow start but overcame that. Splitting up was good, punctuation would be nice to see improved. For concepting make sure everyone is involved in the big steps.

Ruben: Overall it went pretty well. Important to keep adjusting when needed. Initial concepting session lacked initiative/proactivity. Better follow-up of guidelines. Would be nice to see more motivation than just finishing study.

General note:

New starting time is 9:30

Weekly distribution is now 2 days, dialed down from 3
