

Questions

- What is Zenya? (prob a demo of zenya, epd, etc) Can we get a demo?
- Who are the stakeholders?
- What is the vision for the project (5-10 years)?
- Who are the user groups?
- How will we get access to Zenya?
- How many users will be available for us to work with?
- How can we contact them?
- Would we be able to perform contextual inquiry on location?
- How often will they be available? etc.
- What is the expected timeline? (2 week sprints? retrospectives? sprint plannings?)
- What technologies are used?
- How are the protocols with instructions related to EDP?

We need to research whether one solution fits all or if different types of solutions are needed for specific use cases.

Zenya sells to a lot of different organisations which means their products must be flexible. Usually, healthcare institutions have very specific needs.
